- describe development and current trends within the music industry and music distribution
- produce web pages with html and css
- understand the web backend with server side generated content
- describe the internet structure
- understand and use search engine optimization and page rank
- have a basic understanding of web 2.0 including social media and cloud computing
- use and understand metadata and semantic web in a web context

in order to

- communicate with actors within the media industry
- be able to produce various kinds of media.

Course contents

Production technologies for print products, digital video and web.
Project work that links together the sections of the course.

Course literature

To be announced at least 4 weeks before course start.

Examination

- LAB1 - Laboratory Work, 7.5 credits, grading scale: P, F
- TEN1 - Examination, 7.5 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

In this course all the regulations of the code of honor at the School of Computer science and Communication apply, see: http://www.kth.se/csc/student/heder-skodex/1.17237?l=en_UK.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
