EJ1200 Electric Power Systems 6.0 credits

Eleffektsystem

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for EJ1200 valid from Spring 2019

Grading scale

A, B, C, D, E, FX, F

Education cycle

First cycle

Main field of study

Electrical Engineering,Technology

Specific prerequisites

Basic requirements to study at Swedish universities including Swedish B and english A or equivalent.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

When the student has passed the course, the student should:

- know active, reactive and apparent power.
- be able to calculate mean values, peak values, rms-values, and harmonics.
- be able to analyse three phase systems using single phase equivalent circuits, phasor diagrams, and jw-method.
- be able to describe different nodes in a power system.
- be able to calculate transmission of power in power systems.
- be able to do calculations on magnetic circuits.
- be able to calculate magnetic forces by using the law of magnetic force, virtual work, and Maxwell's tensions.
- describe rotating magnetic fields
- describe the function of the transformer, transmission lines, synchronous machine, one- and three-phase power electronic converters.
- by using the jw-method, equivalent circuits and phasor diagrams, be able to analyse transformer, transmission lines, synchronous machine, and one- and three-phase power electronic converters.

Course contents

Fundamental concepts and problem areas. Single-phase and three-phase power, transmission line models. Transmission of power. Ferro-magnetic circuits.The transformer. Magnetic forces. The synchronous machine. Single-phase and three-phase power electronic inverters. Electrical drives.

Course literature

Kurskompendium

Examination

- KON1 - Written Test 1, - credits, grading scale: P, F
- KON2 - Written Test 2, - credits, grading scale: P, F
- KON3 - Written Test 3, - credits, grading scale: P, F
- LABA - Laboratory, 0.5 credits, grading scale: P, F
- LABB - Laboratory, 0.5 credits, grading scale: P, F
- LABC - Laboratory, 0.5 credits, grading scale: P, F

- TEN1 - Examination, 4.5 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
