

# EK2210 Project in Microsystem Technology 15.0 credits

Projekt i mikrosystemteknik

This is a translation of the Swedish, legally binding, course syllabus.

## Establishment

Course syllabus for EK2210 valid from Spring 2019

## Grading scale

P, F

## Education cycle

Second cycle

## Main field of study

Electrical Engineering

## Specific prerequisites

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

On completion of the course, the participants should be able to work independently with advanced development work in the area of microsystems.

## Course contents

Individual project within the scope of the research activities at dept for Microsystems technology.

## Examination

- PRO1 - Project, 15.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
