EK2210 Project in Microsystem Technology 15.0 credits
Projekt i mikrosystemteknik

This is a translation of the Swedish, legally binding, course syllabus.
If the course is discontinued, students may request to be examined during the following two academic years

Establishment
Course syllabus for EK2210 valid from Spring 2019

Grading scale
P, F

Education cycle
Second cycle

Main field of study
Electrical Engineering

Specific prerequisites

Language of instruction
The language of instruction is specified in the course offering information in the course catalogue.
Intended learning outcomes
On completion of the course, the participants should be able to work independently with advanced development work in the area of microsystems.

Course contents
Individual project within the scope of the research activities at dept for Microsystems technology.

Examination
• PRO1 - Project, 15.0 credits, grading scale: P, F
Based on recommendation from KTH’s coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Ethical approach
• All members of a group are responsible for the group’s work.
• In any assessment, every student shall honestly disclose any help received and sources used.
• In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
