

EN2720 Ethical Hacking 7.5 credits

Etisk hackning

This is a translation of the Swedish, legally binding, course syllabus.

Establishment

Course syllabus for EN2720 valid from Autumn 2017

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Electrical Engineering

Specific prerequisites

- Basic skills in programming (for example DD1315 Programming Techniques and Matlab, D1316 Programming Techniques and C, DD1337 Programming, ID1018 Programming I or equivalent)
- English B/English 6 (or equivalent)

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

Ethical hackers are contracted for practical assessment of computer network security. Furthermore, for an effective defense against cyber attacks, a deep understanding of attackers' available range of action is required. After completed course, the student should therefore be able to

- perform reconnaissance, identifying and selecting targets for attack, e.g. by means of network scanning,
- identify vulnerabilities in network equipment and applications,
- develop exploits for software vulnerabilities,
- deploy and execute exploits on vulnerable systems,
- install and use remote access trojans for remote system control,
- identify password files and extract passwords,
- exfiltrate data,
- implement solutions to strengthen the information security of computer networks.

Course contents

The main activity of the course is a project where students independently attack a corporate computer network with the aim of exfiltrating specific information. The network is rigged by the course responsables in a virtual environment. Tools for network and vulnerability scanning, platforms for exploit development, command and control, password cracking, etc. are presented during the course, but students are free to employ methods and tools of their own choice.

Course literature

Course literature will be posted on the home page of the course at the latest four weeks before the start of the course.

Examination

- SEM1 - Seminar, 1.5 credits, grading scale: P, F
- PRO1 - Project, 6.0 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

The final grade is equal to the grade of the project.

Other requirements for final grade

Each part of the examination must be passed.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
