

# F1D5307 Climate Technology, Applications 7.5 credits

Klimatteknik, tillämpningar

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

## Establishment

Course syllabus for F1D5307 valid from Spring 2018

## Grading scale

undefined

## Education cycle

Third cycle

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

The objective of this course is to provide a deeper understanding of the building service and energy systems used for indoor environmental management in specific types of buildings and applications, with key focus on systems for ventilation, heating/cooling, lighting and management of the acoustic environment. Relevant issues are discussed with the over-arching goal of achieving high indoor environmental quality, high user well-being and satisfaction, high energy efficiency, as well as optimal overall building performance.

## Course contents

Climate technology applications are discussed in the context of:

- High-performance buildings (e.g. near-zero, positive energy buildings)
- Office buildings
- Residential buildings
- Hospitals, schools and other special environments

## Specific prerequisites

Master of Science in Civil and Architectural Engineering or similar, with an undergraduate course in indoor environment/energy systems/building services technologies or equivalent.

## Course literature

The course literature is specified before each course offering and disclosed in the course program.

## Examination

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
