If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for F1N5407 valid from Autumn 2009

Grading scale

Education cycle

Third cycle

Specific prerequisites

The course is open for PhD students in environmental strategies research and related subjects.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The aim of course is to give students knowledge in area of relevance for environmental strategies research.

Course contents

The course includes independent studies of literature of relevance for environmental strategies research. Relevant literature can for example be on methods for environmental systems analysis or scenario methods. The literature is chosen by the examiner, the main supervisor and the students. The literature can for example consist of a book and a number of scientific papers. Normally the content should be at least 500 pages.

The course is open for PhD students in environmental strategies research and related subjects.

Examination

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

The literature is presented at a seminar or in an oral examination. A written summary of the literature should also be presented.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
