

# F3A5322 Current Topics in Molecular Biotechnology 3 3.0 credits

## Aktuella frågeställningar inom molekylär bioteknologi 3

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

## Establishment

Course syllabus for F3A5322 valid from Spring 2009

## Grading scale

## Education cycle

Third cycle

## Specific prerequisites

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

The participants should gain knowledge in reading, interpreting and presenting results, published by other groups in international research journals, to an audience of researchers and PhD students that include persons whose research does not necessarily relate to the specific topics and areas presented.

## Course contents

Seminars each week (1 student presentation/occasion) where the students explain background, results and implications of recently published findings, followed by active discussions.

## Course literature

Individually selected for each student.

## Examination

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

The students will give 2 seminars each and participate in 80% of scheduled sessions during two terms.

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
