

# FAF3005 Project in Structural Engineering 7.5 credits

Projektarbete i byggkonstruktion

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

## Establishment

Course syllabus for FAF3005 valid from Autumn 2014

## Grading scale

undefined

## Education cycle

Third cycle

## Specific prerequisites

Entry requirements for PhD studies

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

After completed course, the student will be able to describe the work within a deep project study in the field of structural engineering.

## Course contents

The course can be a theoretical or experimental study in the field of structural engineering or it can be a literature review.

## Course literature

Communicated at start of course.

## Examination

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

## Other requirements for final grade

Passed written project report

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
