

# FAF3010 Review of Scientific Articles in Civil and Architectural Engineering 1.5 credits

Granskning av byggvetenskapliga artiklar

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

## Establishment

The course syllabus is valid from spring term 2022.

## Grading scale

P, F

## Education cycle

Third cycle

## Specific prerequisites

Equivalent to the prerequisites for admittance to third cycle studies in civil and architectural engineering at KTH.

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

After completed course, the PhD student will:

- Understand the review process for scientific journal articles.
- Be able to complete a review assignment of a scientific article in the student's own field.

## Course contents

The course consists of an assignment that is determined by the doctoral student's supervisor and the course responsible. The assignment consists normally of a review of a real scientific journal article, or equivalent material, with assistance from the supervisor.

## Examination

- INL1 - Hand-in assignment, 1.5 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
