

FAF3418 Quality Assurance of a Building's Technical Properties

7.5 credits

Kvalitetssäkring av en byggnads tekniska funktion

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for FAF3418 valid from Autumn 2019

Grading scale

P, F

Education cycle

Third cycle

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After the course, the student shall

- be oriented in test methods that are used for quality assurance of the technical performance of a building;
- be able to deal with fundamental performance demands and test methods available for these performance demands;
- be able to show how these methods can be applied for making buildings developing in a sustainable way.

Course contents

The course gives a deeper understanding about the methods applied in practice for quality assurance of the technical properties of a building.

Specific prerequisites

Master of Science in Civil Engineering or similar, with an undergraduate course in building technology.

Examination

- RAP1 - Project report, 5.0 credits, grading scale: P, F
- TEN1 - Oral exam, 2.5 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
