

FAF3608 Project in Soil and Rock Mechanics 7.5 credits

Projektarbete i jord- och bergmekanik

This is a translation of the Swedish, legally binding, course syllabus.

Establishment

Course syllabus for FAF3608 valid from Spring 2019

Grading scale

P, F

Education cycle

Third cycle

Specific prerequisites

Master degree in civil engineering or the equivalent entry requirements for third cycle studies in civil engineering

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After the course, the student shall be able to report the results of a project work within the specialisation soil and rock mechanics.

Course contents

The project may have the form of a theoretical or experimental study that is planned together with the examiner. The project can also be performed as a literature review. The content shall be associated with a long-term sustainable societal development.

Examination

- PRO1 - Project work, 7.5 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

The project is examined orally or in written form, as agreed with the examiner

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
