

FAG3183 Project in Urban and Regional studies 10.0 credits

Projektkurs i urbana och regionala studier

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for FAG3183 valid from Spring 2020

Grading scale

P, F

Education cycle

Third cycle

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The aim of the course is to give deeper insights in topics of relevance for urban and regional studies.

Course contents

The project is directed to doctoral students in Urban and Regional Studies, and is done as project work. The work should contain elements such as goal formulation, data gathering, presentation and discussion or analysis of results. An example of a relevant project can be a research project performed for an agency or a company and presented in a user-friendly report.

The project should normally be separate from the student's doctoral thesis work. If the project work and the thesis work overlap, it should be clearly explained. The project can be done in cooperation with others. If so, the contribution of the student and of co-workers should be clearly described. The project work should equal 265 hours of fulltime work. Overlaps with doctoral work and work done by other contributors to the project should not be included.

Specific prerequisites

Examination

- PRO1 - Project, 10.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.

Additional regulations

The course is primarily open to doctoral students in Urban and Regional Studies.
