

FAL3512 Methods in Sustainability Science 7.5 credits

Metoder för hållbarhetsforskning

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for FAL3512 valid from Autumn 2018

Grading scale

Education cycle

Third cycle

Specific prerequisites

Prerequisites: Same as for being admitted to the PhD program Planning and Decision analysis.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The course intends to give an overview of methods used within research on strategies for sustainable development and to give PhD students an opportunity to connect various tools and relevant methods with their own research.

Course contents

The course is given as a series of lectures and seminars with literature and questions that are to be responded to and discussed.

Course literature

Selection of scientific articles that may vary between years.

Examination

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

A short report relating the different seminars to own research.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
