

FBB3340 Seminars in Industrial Biotechnology year 4 3.0 credits

Seminarier i industriell bioteknologi år 4

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for FBB3340 valid from Spring 2014

Grading scale

Education cycle

Third cycle

Specific prerequisites

MSc in Biotechnology

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

For whom:

Postgraduate students in their fourth year of study.

Understanding of the research frontier in Industrial Biotechnology. Knowledge in research methodology.

Course contents

Seminars based on the students studies, presentations and written presentations of own research and the research literature.

Course literature

Valda publikationer/Selected publications

Examination

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Attendance: 80% of the seminars evenly distributed between spring and autumn semesters. Presentation of research studies in writing and orally. Written comments to the other students presentations at each meeting.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
