

# FCK3317 Project course Chemical Science and Engineering 1.5 credits

Projektkurs Kemivetenskap

This is a translation of the Swedish, legally binding, course syllabus.

## Establishment

Course syllabus for FCK3317 valid from Spring 2020

## Grading scale

P, F

## Education cycle

Third cycle

## Specific prerequisites

Eligible for studies at the third-cycle level.

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

After completion of the course the doctoral student should have the knowledge and ability to

- Demonstrate for the level of the course adequate acquired knowledge in a specific part of the area Chemical Science and Engineering.
- Design, plan and carry out a project to address a scientific problem within the specialized scope of the course.
- Orally present, and critically evaluate and discuss own project results.
- Reflect on the selected scientific problem with respect to environmental, human or societal aspects

## Course contents

Individually designed and performed project work in relevant topic within the frame of Chemical Science and Engineering.

## Examination

- PRO1 - Project, 1.5 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

The project is examined orally.

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
