

FDM3510 Current Topics in Technology-Enhanced Learning

7.5 credits

Aktuell forskning i teknikförstärkt lärande

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for FDM3510 valid from Autumn 2011

Grading scale

P, F

Education cycle

Third cycle

Specific prerequisites

Admitted to PhD studies

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

On completion of the course, the participant should be acquainted with current research and have ability to review and analyse studies critically within "technology-enhanced learning".

Course contents

- Overview of current research within "technology-enhanced learning".
- Critical review and analysis of selected articles and projects in seminars.
- Advanced study about current research relevant to the doctoral student's scientific interest.

Examination

- EXA1 - Examination, 7.5 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

Active participation in seminars and written literature survey.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
