

FED3340 Fusion Technology 8.0 credits

Fusionsteknologi

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for FED3340 valid from Spring 2019

Grading scale

P, F

Education cycle

Third cycle

Specific prerequisites

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After completed course the students should have knowledge on the construction of a fusion reactor; the processes decisive for wall erosion and fuel retention; the criteria for material

selection for reactor components; operation of the fuel plant; analysis of reactor materials: effects of neutrons on material damage; assessment of power loads; construction and application of diagnostics.

Course contents

Reactor-class fusion devices: concepts and structure. D – T fusion and consequences of energy release: power handling, material erosion and damage, selection and qualification of materials, armour materials, magnets. Vacuum technology for a reactor: vacuum vessel and vacuum pumps. Fuel handling: requirements, fuel cycle and fuel plant. Material testing and analysis, neutron-induced effects in construction and diagnostic materials; remote handling of components.

Examination

• EXA1 - Examination, 8.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

Final oral exam and seminar presentation.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
