

FID3008 Advanced Topics in Distributed Systems 7.5 credits

Avancerade områden inom distribuerade system

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for FID3008 valid from Autumn 2011

Grading scale

Education cycle

Third cycle

Specific prerequisites

Good theoretical knowledge of distributed systems

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The students shall after the course:

- be able to describe research areas in the field
- be able to, through reading research articles, understand a problem description and its solution
- be able to discuss problem descriptions and proposed solutions
- have the skill to acquire relevant material to better understand a topic
- be able to summarize and present a research report

Course contents

The course consists of a series of lectures on advanced topics in distributed systems, as well as seminars where the students will present and discuss research topics in distributed systems

Course literature

Research articles

Examination

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Examination is based on oral exam, compulsory attendance, delivery and presentation of assignments

Grading scale: Pass / Fail

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
