

# FKD3030 Literature Survey in Corrosion Science 4.5 credits

Litteraturstudie i korrosionslära

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

## Establishment

Course syllabus for FKD3030 valid from Autumn 2009

## Grading scale

undefined

## Education cycle

Third cycle

## Specific prerequisites

To be enrolled as graduate student in Materials Science and Engineering, directed towards Corrosion Science.

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

To gain experience in completing a literature survey in the field of corrosion science.

## **Course contents**

Collect literature and analyze results in order to complete a corrosion-related literature survey in collaboration with an industry or other organization.

## **Course literature**

Selected after consultation with the course coordinator.

## **Examination**

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

## **Other requirements for final grade**

The literature is presented as a report, which must not be part of the doctoral thesis.

## **Ethical approach**

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
