

FKD3150 Literature Survey in Corrosion Science 7.5 credits

Litteraturstudie i korrosionslära

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for FKD3150 valid from Spring 2010

Grading scale

Education cycle

Third cycle

Specific prerequisites

MSc-degree with a major in chemistry, materials science or physics

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

To gain experience in completing an extended literature survey in the field of surface and corrosion science.

Course contents

Collect literature data and analyze the results in order to complete an extended corrosion-related survey in collaboration with an industry or other research organization.

Course literature

To be agreed with the examiner

Examination

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

LIT 1-Literature survey, 7,5 hp

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
