

FMH3917 International Seminar within Materials Processes

6.0 credits

Internationellt seminarium inom materialprocesser

This is a translation of the Swedish, legally binding, course syllabus.

Establishment

Course syllabus for FMH3917 valid from Autumn 2020

Grading scale

P, F

Education cycle

Third cycle

Specific prerequisites

Admitted to doctoral studies, in the subject area of materials science and engineering or within other related doctoral programs.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After the course the student should be able to:

- Write a scientific report in an academic manner and in an internationally accepted conference form
- Present scientific results and respond to them in front of an international audience

Course contents

The focus is on learning to write a scientific report according to an internationally accepted conference format. In addition, it is included to be able to present it in an international context. The learning is focused on writing and presenting research in an academic way and defending what has been written in front of an international audience.

Examination

- PRO1 - Project, 6.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
