

# FSK3511 Cellular Biophysics II 6.0 credits

### Den biologiska cellens fysik II

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

### **Establishment**

Course syllabus for FSK3511 valid from Autumn 2010

# **Grading scale**

# **Education cycle**

Third cycle

# Specific prerequisites

# Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

The course intends to provide:

• Knowledge of the fundamental physical principles for the electrical properties of living cells.

- Mathematical models describing membrane and action potentials
- An introduction to electrophysiological measurement techniques.

#### Course contents

#### **Seminars:**

The course is given as a series of seminars where the participants take an active role. The topics to be discussed: cellular electrical potential, mechanisms generating electrical potential, action potentials, model descriptions, the cable model, the Hodgkin-Huxley model, neuronal cells, voltage gated ion channels.

#### **Laboratory exercise:**

Electrophysiological measurement of membrane potential.

#### Course literature

Weiss TF, "Cellular Biophysics, vol 2: Electrical properties", MIT Press 1997

### **Examination**

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

- INL1 Assignments, 1.5 credits, grade scale: P, F
- LAB1 Laboratory Work, 1.5 credits, grade scale: P, F
- TEN1 Examination, 3.0 credits, grade scale: P, F

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
