Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Specific prerequisites

An academic degree of at least 180 academic credits (Swedish hp) and documented proficiency in Swedish B and English A or equivalent. In addition knowledge in Basic logistics or equivalent.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The purpose of this course is to describe the legal problems arising from buyers and sellers of transport and logistic services.

After the course the participants will be able to:

- solve legal problems concerning Third-Party-Logistics and Cross-docking
- solve legal issues connected with electronic trade
- solve elementary legal problems within those areas
- decide when legal experts must be requested

Course contents

- The rights and the administrations of justice: The character of the legal system. The different sources of rights. The judiciary and arbitration.
- Raising and judging of contracts in relation to the trade agreement – NSAB 2000.
- The legal aspects of contract is dealt with on a domestic and international point of view including terms of delivery (Incoterms 2000), breach of contract, cash on delivery, cash against documents, letter of credit, and general average.
- Law of damages and law of torts.
- Problems arising when there are more than two parties involved, Third-Party Providers.
- The different law of different transport – sea, railway, road, and aviation – and multi-modal transport and successive carriage is thoroughly examined.
- Cargo and liability insurance is carefully treated.
- The rules concerning which legal provision to be used in each case is dealt with.
- The logistics in the future – which are the problems.

Disposition

The course consists of lectures, excersises and project work
