Having passed the course, the student shall be able to:

- identify and describe examples of ethics and sustainability aspects related to the student's subject area
- orally as well as in writing give examples of and explain societal and ethical aspects as well as sustainable development in the student's subject area.

Course contents

The course contains the following parts:

- Research ethics
- The professional role and ethics
- Research ethics: people as research subjects and computer issues
- Sustainable development:

Specific prerequisites

Examination

- PRO1 - Online quiz, 1.5 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
