

IS2205 Individual Studies in Computer Systems 7.5 credits

Individuella studier i datorsystemteknik

This is a translation of the Swedish, legally binding, course syllabus.

Establishment

Course syllabus for IS2205 valid from Autumn 2008

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Specific prerequisites

The admittance to this course is by invitation only.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

Since this is an individual course whose contents varies depending on the students project ideas and previous knowledge, the individual learning outcomes will vary for each student.

The general learning outcomes is that the student after the course should be able to:

- Make a detailed plan of a smaller research project from a coarse plan
- Critically value experimental results from known knowledge and the goals of the project
- Document the project's goals, approach and results
- Plan for relevant publication of the project

Course contents

The contents of the course is determined individually for each student.

Course literature

Research papers and other publicly available material.

Examination

- EXAM - Examination, 7.5 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

Other requirements for final grade

Finalized project with written and oral documentation.

Grading is similar to that of degree project.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.

- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
