

KD1020 Introductory Chemistry

6.0 credits

Inledande kemi

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for KD1020 valid from Autumn 2007

Grading scale

A, B, C, D, E, FX, F

Education cycle

First cycle

Main field of study

Chemistry and Chemical Engineering, Technology

Specific prerequisites

Chemistry, physics and mathematics on Secondary School level, or corresponding knowledge.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

To give the students

- an overview of the different parts of chemistry and how these are connected
- basic knowledge about the structure and properties of chemical compounds
- ability to perform stoichiometric and thermochemical calculations
- basic skills in laboratory work
- training in reading chemical literature in English.

Course contents

- Chemical equations, stoichiometry, thermochemistry.
- An overview of methods used in modern chemistry e.g. chromatography, spectroscopy, diffraction methods.
- The basic principles of chemistry: the chemical bond, chemical equilibrium, reactivity.
- Laboratory exercises: laboratory safety, synthesis and analysis.

Course literature

See the course page.

Examination

- LAB1 - Laboratory Work, 1.5 credits, grading scale: P, F
- TEN1 - Written exam, 4.5 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

Written exam, TEN1;4,5 credit
Laboratory course, LAB1;1,5 credit

Ethical approach

- All members of a group are responsible for the group's work.

- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
