

# KH1122 Analytical Chemistry 7.5 credits

#### Analytisk kemi

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

#### **Establishment**

Course syllabus for KH1122 valid from Autumn 2007

# **Grading scale**

A, B, C, D, E, FX, F

## **Education cycle**

First cycle

## Main field of study

Chemistry and Chemical Engineering, Technology

# Specific prerequisites

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

### Intended learning outcomes

The general aim of this course is to give theoretical and practical knowledge concerning both fundamental analytical chemistry, and modern chemical measurement techniques.

When you have passed the course you will be able to:

- Perform fundamental chemical analyses within the areas of wet chemistry, potentiometry, spectroscopy and gas chromatography and describe how to carry out these methods.
- Describe the fundamental principles for the methods, which problems can appear, and how to handle these problems.
- Explain causes of error in analyses and properly estimate these errors through the process of handling data and using statistics.
- Perform calibrations and calculations that are related to the quantitative chemical analysis.
- Describe the problem of sampling and the contribution of this problem to the final measurement.

#### Course contents

Sampling. Quantitative analytical chemistry including applications. Gravimetry. Titrimetry. Electrochemical measuring methods. Chromatographical methods. Spectrometrical methods.

#### **Course literature**

Harris, D C, Quanititative Chemical Analysis, 6td Ed, Freeman & Co

#### **Examination**

- LAB1 Lab-Work, 3.0 credits, grading scale: P, F
- TEN1 Written examination, 4.5 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

### Other requirements for final grade

Written exam (TEN1; 4,5 cr.). Passed lab sessions (LAB1; 3 cr.)

### Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
