

# KH138X Degree Project in Chemical Engineering and Tech- nology, First Cycle 15.0 credits

Examensarbete inom kemiteknik, grundnivå

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

## Establishment

Course syllabus for KH138X valid from Spring 2020

## Grading scale

P, F

## Education cycle

First cycle

## Main field of study

Technology

## Specific prerequisites

At least 140 credits completed in courses in the engineering programme in chemical engineering and passed in the advanced courses that are required for the degree project.

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

### Course contents

The work should include problems that give specialisation/broadening within the main subject. The degree project is carried out independently. The work is normally done at a workplace outside KTH. The student is supervised during the work by supervisors at both KTH and in the workplace.

### Examination

- XUPP - Examination, 15.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

### Other requirements for final grade

If the student has not presented an approved degree project within 12 months from the start date, the degree project will be failed.

### Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
