

# **KH139X Degree Project in Chemical Engineering and Tech- nology, First Cycle 15.0 credits**

**Examensarbete inom kemiteknik, grundnivå**

This is a translation of the Swedish, legally binding, course syllabus.

## **Establishment**

Course syllabus for KH139X valid from Autumn 2007

## **Grading scale**

A, B, C, D, E, FX, F

## **Education cycle**

First cycle

## **Main field of study**

Chemistry and Chemical Engineering, Technology

## **Specific prerequisites**

At least 120 credits from the chemical engineering programme and passed courses required for the degree project.

## **Language of instruction**

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

To independently apply to engineering skills and knowledge acquired during the education.

## Course contents

The work shall include problems deepen or broaden aspects of the main subject. The degree project is independently conducted by one or two students. The work is normally localized at a work place outside KTH. The student will be guided by supervisors at KTH and at the work place.

## Examination

- XUPP - Examination Question, 15.0 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

## Other requirements for final grade

A written report and an oral presentation (XUPP; 15 cr)

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
