

# LI107N Information Retrieval for Scientists and Engineers 6.0 credits

Informationssökning för naturvetare och ingenjörer

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

## Establishment

Course syllabus for LI107N valid from Autumn 2008

## Grading scale

P, F

## Education cycle

First cycle

## Main field of study

Technology

## Specific prerequisites

Students should have knowledge within a given area equivalent to at least three years' full-time university studies, and must be able to express themselves fluently in English in that area. Without this knowledge, they will be unable to formulate appropriate and applicable search profiles and to analyse the search results.

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

On completion of the course, the student shall be able to:

- critically analyse and formulate his or her information needs,
- select - from several alternatives - the most effective way of satisfying those needs, and
- write scientific reports in Swedish.

## Course contents

More specifically, on completion of the course, the student shall be able to:

- present and describe the various channels of communication in the sciences and in research and the importance of each,
- use the most important databases within his or her area of study, as well as other electronic and print sources of information,
  - for both simple and complex searches,
  - using a wide variety of user interfaces, including those with which the student has no prior experience,
- navigate through the major computer-based catalogues in international public libraries as well as the major bibliographic networks, in order to best utilise these and other library resources,
- when necessary, obtain documents through sources other than the library,
- write a scientific report in Swedish within a field of technology, and
- critically assess the source, content and reliability of information which is retrieved.

## Course literature

Course literature is listed in the description of the course available in BILDA, as well as on the Internet, and includes:

- "VÄGAR TILL VETENSKAPLIG INFORMATION" by E Kihlén, A Lantz 3:e Rev Uppl, 2005
- "Into Info", a system of programs for learning about how to obtain and handle information in engineering, science and medicine
- "Informationssökningens när? var? hur?", KTHB's introduction to information searching
- Handouts
- TNC's "Skrivregler för svenska och engelska", ISBN 91-7196-100-3.

## Equipment

Access to a computer with an Internet connection and web browser is an absolute requirement. Students should obtain a library card from the KTH Library before starting the course.

## Examination

- INL1 - Assignment, 1.5 credits, grading scale: P, F
- LIT1 - Literature Study, 1.5 credits, grading scale: P, F
- TEN1 - Examination, 1.5 credits, grading scale: P, F
- ÖVN1 - Exercise, 1.5 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

## Other requirements for final grade

A pass mark requires

1. Satisfactory results in exercises and assignments,
2. Satisfactory presentation of searches carried out in an area chosen by the student,
3. Participation in the four discussions which form part of certain course modules, and
4. Satisfactory results in the report-writing module.

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
