

# LS2552 Swedish B2/C1 for Engineers 7.5 credits

Svenska B2/C1 för ingenjörer

This is a translation of the Swedish, legally binding, course syllabus.

## Establishment

On 15/10/2021, the Dean of the ITM school has decided to establish this official course syllabus to apply from spring term 2022, registration number: M-2021-1895.

## Grading scale

P, F

## Education cycle

Second cycle

## Main field of study

## Specific prerequisites

General admission requirements Completion and pass of Swedish B2 for Engineers, equivalent older course, or the equivalent knowledge demonstrated in a compulsory placement test taken before applying for the course.

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

The intended learning outcomes for the course are primarily at levels B2 and C1 according to the CEFR, the Common European Framework of Reference for language, and aim to strengthen student's global competence.

On completion of the course, the student should, in addition to what is specified in courses at a lower level, be able to:

### Listening comprehension

1. Understand the main contents in clearly spoken standard Swedish on subjects that concern well-known phenomena and fields of personal interest
2. Broadly understand many radio and TV programmes in slowly and clearly spoken Swedish about current issues or about subjects of personal interest

### Reading comprehension

3. Understand authentic texts, such as descriptions, written in common language on subjects that concern daily life or personal interests

### Spoken interaction

4. Talk informally about subjects concerning daily life, current events and work, or of personal interest

### Spoken production

5. Simply describe events, dreams, hopes and future plans
6. Briefly give reasons for opinions and plans

### Written production

7. Write texts that describe experiences and impressions
8. Write simple, coherent texts discussing everyday life, and simple technical texts within fields of personal interest

## Course contents

Oral presentations, discussions and listening comprehension. Exercises in reading popular science/non-fiction texts about both general and more specific subjects, to increase the understanding of current themes within society, technology and natural sciences (for example research ethics, sustainable development, technological breakthroughs). Writing discussing and investigating texts. Exercises on differences between spoken and written language and between levels of formality.

## Examination

- KONA - Assessment, 1.5 credits, grading scale: P, F
- LEX1 - Continuous Assessment, 6.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

In agreement with the KTH coordinator for disabilities, it is the examiner who decides to adapt an examination for students in possession of a valid medical certificate documenting a disability. The examiner may permit other examination formats at the re-examination of individual students.

## Other requirements for final grade

All course components passed  
75% attendance requirement

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
