### Main field of study

**Industrial Management** 

# Specific prerequisites

Admitted program students on KTH

### Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

# Intended learning outcomes

The course aims at providing fundamental knowledge on project management in different kinds of industrial settings. Having completed the course, the students will be prepared to work in industrial project settings. After the course the students will (1) be familiar to basic project models and project tools, (2) know the fundamental activities and responsibilities of the project manager from idea to handing over the project result to the customer, (3) be familiar with contextual complexity and its effects, (4) know the central project roles and their responsibilities, and finally (5) understand the role of communication in project settings.

#### Course contents

The project idea and basic project concepts, project management models and tools, project planning, project organizing, project control, project communication, risk assessment and contextual awareness.

#### **Course literature**

Will be announced at the beginning of the course.

#### **Examination**

- ÖVN1 Exercises, 3.0 credits, grading scale: P, F
- TEN1 Examination, 4.5 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

# Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
