

ME2046 Managing Risks in Complex Technical Systems 6.0 credits

Riskhantering i komplexa tekniska system

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for ME2046 valid from Autumn 2009

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Specific prerequisites

Two years academic studies is demanded. ME2041 Psychology for engineers, or ME2040 Human factors engineering are recommended.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After completing the course the student will be able to:

- Discuss risks, for example: how do we perceive risks, how do we communicate risks, how does society estimate and value risks, what are common risks?
- Give relevant information of risks.
- Describe the relationship between work organization, management and safety cultures.
- Use theories and models to describe how organizations can help prevent accidents in complex technical systems.
- Identify risks within an organization using methods of risk analyses.
- Argue for various definitions of risks.

Course contents

The course gives 5 seminars with assigned literature and guest speakers. After the seminars an individual project is conducted. The project could for example be an accident analysis or analysis of risk management within an organization in your field.

Course literature

Hand-outs.

Examination

- PRO1 - Project, 3.0 credits, grading scale: A, B, C, D, E, FX, F
- SEM1 - Seminars, 3.0 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.

- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
