Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After completing the thesis, the student should be able to:

- Through its work to identify needs and acquire deeper knowledge and show a significant deepening in any of the subdivisions in Industrial Management
- Independently plan, formulate, analyze and generate solutions to complex problems in Industrial Management
- On the second level to discuss, explain and apply current research, scientific theories and practices relevant to the thesis
- Both orally and in writing present the results of the thesis and provide relevant feedback on other students' work by the opposition
- Describe, analyze and propose changes to work, processes and structures within an organization with regard to safety and possible to other social aspects. This also applies when students are involved in a research project or work around a more individually selected problems
- Discuss your own conclusions where the possibilities and limitations are compared to the economic, social and environmentally sustainable aspects
- Through discussion of the theory and the results show the ability to make judgments with regard to scientific method and ethical aspects in relation to his own study.

Course contents

The main part of the course is to carry out the scientifically based investigation resulting in a written report, the master thesis. To secure relevant, interesting and valid results, the work must utilize established knowledge as well as generate new knowledge with the help of established theories and methods. The master thesis demands an interaction between theory, methods and empirical facts; thus the student has to be familiar with the academic world as well as with the world of the principal.

As a support the department offers tutoring and seminars during the work. The continuous discussion of the master thesis work with supervisors and in seminars is an important part of the course.

Disposition

A series of seminars

Examination

- PRO1 - Project, - credits, grading scale: P, F
