Education cycle

Second cycle

Main field of study

Industrial Management

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After passing the course, the students should be able to:

1. give an account of leading frames, theories and central concepts related to strategic management
2. analyse strategic management challenges by means of central frames, theories and concepts related to strategic management

Course contents

The course focuses on how to develop and implement a coherent strategy in today's industry with specific emphasis on the conditions that apply for knowledge and technology intensive companies.

The main fields of study for the course are:

- Analysis of the surrounding competitive environment
- Analysis of industrial structures and how these emerge
- Economies of scale and economies of scope
- Discussion on resources and capacities
- Discussion on creating and maintaining competitive advantages
- Organizational transformation and structural change

These main fields of study are discussed based on modern research and with support of a number of shorter case studies that are based on contemporary industrial problems, mainly with Swedish background.

Specific prerequisites

Achieved the requirements for a Degree of Bachelor of Science

ME1314/ME1305 Introduction to Industrial Engineering and Management or ME1003 Industrial Management, Basic Course, completed
