## Undervisningsspråk

Undervisningsspråk anges i kurstillfällesinformationen i kurs- och programkatalogen.

## Lärandemål

The objective of the course is to enable the student to run a business of her/his own. The course is designed to address important issues faced when running a company, focusing on critical processes and in particular processes required in the young firm.

## Kursinnehåll

The course focuses on supporting the student in her/his decisions and other action in the new business venture. It is assumed that students entering the course have a formulated business idea to be realized, as well as a genuine interest in pursuing this business idea in a company of their own.

The outline of the course is built on experience from active entrepreneurs and follows the typical stages in a new venture, starting with the evaluation and refinement of the existing business idea, moving on to resourcing (venture capital supply, internal resources etc), market and communication plans etc. The course will focus on Strategy (What?) – i.e. markets, offer, business idea, getting-started and setting up a board of directors, People (Who?) – i.e. entrepreneurial team, recruitment and motivation, Operational work (Let's do it!) – i.e. management/culture, sales/marketing, production and negotiation.

Theoretically, the course connects to the opportunity based models of entrepreneurship and business creation, as well as to a contextual approach to the venture creation process (i.e. the idea that the very character of the venture creation process is dependent on the type of business, as for instance in the biotechnology, TIME, finance or environmental technology sectors).
