

MF2025 Project Work in Mecha- tronics 6.0 credits

Projektarbete inom mekatronik

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for MF2025 valid from Autumn 2011

Grading scale

P, F

Education cycle

Second cycle

Main field of study

Mechanical Engineering

Specific prerequisites

Qualified for studies in grade 3 and MF1016/4F1816

Masterprogram: TIPUM (not track IPUC), TIPDM and good knowledge in electrical engineering

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The aim of the course is to confront students with research work in limited projects, defined within ongoing research. The students are trained to apply their basic scientific, technological and experimental knowledge and will be able to experience the result.

Course contents

Students work alone or in small groups. Each project is specified and related to ongoing research. A researcher or doctoral student is assigned as project leader.

Examination

- ANN1 - Project Work, 6.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

Project assignment, oral and written presentation (ANN1; 6 cr).

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
