

MG2014 Advanced Welding Technology, Modulus 2 6.0 credits

Svetsteknologi, högre kurs, modul 2

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for MG2014 valid from Autumn 2023

Grading scale

A, B, C, D, E, FX, F

Education cycle

Second cycle

Main field of study

Mechanical Engineering

Specific prerequisites

Finished basic course in Welding engineering (MG1010, MG1011, MG1012)

120 cr in Engineering

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

After passing this course, the student will be able to:

- thoroughly describe the materials technology of welding (weldability and how materials are affected)
- describe different metals and their alloys, and their properties in welded constructions
- describe how different pre- and post-treatment methods affects the materials
- describe advantages and disadvantages of different surface coating methods
- describe how the environment (corrosion, temperature, wear) affects materials and welded constructions
- analyse risks of a welded construction and its defect tolerance
- correctly select material and appropriate welding methodology

Course contents

Materials (mild steel, stainless steel, aluminum, cast iron, etc.) and their behavior during welding. Welding additives (different types for different welding processes, materials), Metrology, standards and documentation.

Examination

- DEL1 - Attendance, - credits, grading scale: P, F
- HEM1 - Home assignment, 1.0 credits, grading scale: P, F
- LABA - Laboratory work, 2.0 credits, grading scale: P, F
- TENA - Written exam, 3.0 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.

- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
