MJ1001 Project Work in Energy Technology 18.0 credits

Projektarbete inom energiteknik

This is a translation of the Swedish, legally binding, course syllabus.

Establishment

Course syllabus for MJ1001 valid from Autumn 2008

Grading scale

A, B, C, D, E, FX, F

Education cycle

First cycle

Main field of study

Technology

Specific prerequisites

General entry requirements and English language skills equivalent to B. In addition,80credits including 30 credits in energy technology. Swedish B is not required.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The course provides an opportunity to further their studies in Energy Technology on the C-level. Energy technology spans a broad area of technology and projects may have very different direction.

Course contents

Students work alone or in small groups with a distinct sub-project. The sub-project may be a recess in a particular field of technology or components, which are specified in an ongoing research project. The work is led by a staff at the department.

Examination

- PRO1 - Project, 18.0 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
