

# SF2938 Seminar in Mathematical Statistics I 4.0 credits

Seminariekurs i matematisk statistik I

This is a translation of the Swedish, legally binding, course syllabus.

## Establishment

## Grading scale

P, F

## Education cycle

Second cycle

## Main field of study

Mathematics

## Specific prerequisites

Depends on the topic of the seminar course. Typically, SF2940 (5B1540) Probability Theory will be required.

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

This course is a specialization in a particular area within Mathematical statistics. The course is given as a seminar series.

## Course contents

Depends on the topic of the seminar course, which will vary over the years.

## Course literature

Depends on the topic of the seminar course.

## Examination

- PRO1 - Project, 4.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

Depends on the topic of the seminar course. 4 credits, P/F.

## Other requirements for final grade

Depends on the topic of the seminar course.

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
