

# SH2611 Small Reactors 6.0 credits

Små reaktorer

This is a translation of the Swedish, legally binding, course syllabus.

## Establishment

The course syllabus is valid from Spring 2022 according to the school principal's decision: S-2022-0529 Decision date: 2022-02-24

## Grading scale

A, B, C, D, E, FX, F

## Education cycle

Second cycle

## Main field of study

Engineering Physics

## Specific prerequisites

Course SH2600 Reactor Physics, or corresponding knowledge

English B / English 6

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

After the course, the participants should be able to

1. Design a small reactor for production of electricity and heat
2. Analyse the safety performance of small reactors
3. Assess the economics for commercial operation of small reactors

## Course contents

Fuel economy in small reactors: Enrichment and control rod worth

Passive safety in small reactors: Reactivity feedback, natural convection and decay heat removal

Severe accidents: Source term and radiological impact on environment

Cost analysis: Capital cost, fuel cost and costs for operation and maintenance

## Examination

- SEM1 - Presentation of SMR design, 1.0 credits, grading scale: P, F
- PRO1 - Project: SMR design, 1.0 credits, grading scale: P, F
- ÖVN1 - Home assignment 1: core design, 1.0 credits, grading scale: P, F
- TEN1 - Oral exam, 1.0 credits, grading scale: A, B, C, D, E, FX, F
- ÖVN2 - Home assignment 2: passive safety, 1.0 credits, grading scale: P, F
- ÖVN3 - Home assignment 3: severe accidents, 1.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

If the course is discontinued, students may request to be examined during the following two academic years.

The course is given in close collaboration with nuclear industry.

Grading is based on the performance during the oral exam

## Other requirements for final grade

Approved grades at all parts

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
