Programme syllabus

Degree Programme in Computer Science and Engineering
Civilingenjörsutbildning i datateknik
300.0 credits

Valid for students admitted to the education from autumn 18 (HT - Autumn term; VT - Spring term).

This is a translation of the Swedish, legally binding, programme syllabus.

Programme objectives

The Engineering programme in Computer Science at KTH aims to give students opportunities and ability to participate in and lead the work on valuation, development and introduction of new computer technology.

Knowledge and understanding

The programme has the goal that a Master of Computer Science and Engineering should:

- have fundamental knowledge within Computer Science and Engineering
- have profound knowledge in mathematics, i.e. have the ability to explain and carry out mathematical reasoning and define and analyse mathematical models.
- have knowledge in human- and natural sciences, especially such knowledge which has consequences for design of computerized systems.
- have knowledge about industrial entrepreneurship and relevant legislation.

Skills and abilities

The programme has the goal that a Master of Computer Science and Engineering should:

- have prerequisites and abilities to participate in and develop the practices which are applied in industry, administration, and academic research.
- have the ability to independently define and solve computer-related construction problems.
- have the prerequisites for successful work in international and multidisciplinary project groups which consist of people from both technical and non-technical backgrounds. This includes the ability to orally, and in writing, present as well as argue in Swedish and English.

Ability to make judgements and adopt a standpoint

The programme has the goal that a Master of Computer Science and Engineering should:

- Independently analyse and adopt a standpoint on economical, societal, environment-related and ethical consequences of computer science applications, and to design systems concerning this.
- Through self-development, retain one’s professional abilities during a professional career.
- Follow and promote the discussion concerning technology in society.

Extent and content of the programme

The Master of Computer Science and Engineering is composed of 300 ECTS credits, which, at normal study rate, corresponds to 5 years of full-time study (10 semesters).
The first three years (180 ECTS credits) are on undergraduate level.

The final two years (120 ECTS credits) the student follow a master programme.

**The academic year 2017/2018 offers the following Master’s programmes for a Degree of Master of Science in Computer Science**

The range of offered Master's programmes may be revised. An updated list of elective Master's programmes can be found on the KTH student web for each respective academic year.

- Computer Science
- Machine Learning
- Interactive Media Technology
- Systems, Controls and Robotics
- Communications systems
- Embedded Systems
- Software Engineering of Distributed Systems
- Industrial Management
- Applied Computational Mathematics
- Medical Engineering
- ICT Innovation

The master's programmes consist of courses mainly on advanced level. The education leads to a master's degree as well as a "civilingenjör" degree.

**Language of instruction**

The language of instruction, during the first three years of the programme is mostly Swedish; although English literature will be used. The concluding two years are taught in English.

**Eligibility and selection**

For eligibility requirements and selection, see the KTH admission policy, www.kth.se

**Latter part of the programme:**

*Eligibility:*
For applicants to the latter part of the computer science programme the applicant must have completed at least 45 credits of the compulsory courses from the programme, which at least 35 credits must be from year 1.

*Selection process:*
If the number of applicants exceeds the number of places available a programme committee will make a selection from the following criteria:

1. evaluation of university
2. grades from previous study
3. motivation to study

The evaluation scale is 1-75.

**Implementation of the education**

**Structure of the education**

Structure of the education
This programme syllabus decided by the CSC Dean 2017-09-01 is valid for students starting the programme during the study year 2018/2019. Which courses that belong to specific study year is decided in the fall the year before. Please see “Study year 1” etc. or the appendices. Changes may occur in the contents of the programme and in the KTH regulations, please see www.kth.se/en/.

The syllabus for the Master of Computer Science and Engineering programme consists of

- compulsory first level courses during study years 1–3 concluded by a degree project at undergraduate level.
- courses within the master’s programme that the student has chosen for study years 4–5, concluded by a degree project at graduate level.
- elective courses at undergraduate and graduate level giving the education the profile desired by the student.

International profile

The international profile starts in study year 2 and includes courses in the profile language and a possibility to spend one or two semesters at one of the KTH partner universities using the language of the profile. Currently the following profile languages are offered: Japanese, Chinese, French, German, and Spanish. Information about application, possible changes to the curriculum and the requirements to achieve an international profile is given during the spring semester of study year 1.

Language engineering profile

The specialisation in Language Engineering begins in the fall semester in study year 2. Information about application, possible changes to the curriculum is given during the spring semester of study year 1.

Bachelor’s degree

The programme is designed in such a manner that the student after three years of studies can obtain a bachelor’s degree. The student can then continue his/her studies on the Computer science and engineering programme, continue his/her studies in another programme at KTH or another University in Sweden or abroad or start his/her work career.

Academic year

The KTH academic year is 40 weeks, divided into four periods.

For details about the structure of the academic year see http://www.kth.se/en/

Courses

The programme is course-based. Lists of courses are included in appendix 1.

The course goals, prerequisites, contents and examination requirements are found in the course syllabus in the Course and programme directory on the KTH student web. The programme consists of compulsory, conditionally elective and elective courses. The compulsory courses are defined in course lists for each study year.

Elective courses can be chosen from KTH’s course selection for Master of Science in Engineering programmes. Courses from other universities can be recognized for credit, if the degree requirements are fulfilled.

For elective courses, the following restrictions apply:

- Elective courses can not be taken in study year 1
- Only in exceptional cases can elective courses be taken in study year 2
- The number of credits that can be chosen per semester can be limited.
- Elective courses may not overlap a course already taken to a considerable extent.
- Higher education preparation courses may not be counted as elective course.
- Courses on lower levels within a subject than the programme courses may not count as elective courses.
Grading system

Courses in the first and the second cycle are graded on a scale from A to F. A-E are passing grades, A is the highest grade. The grades pass (P) and fail (F) are used for courses under certain circumstances.

Since the grading systems differ very much between different countries, the grades are not translated from exchange studies abroad.

Conditions for participation in the programme

Participation requires admission to courses within the programme and course registration. Course registration is done via the personal menu at www.kth.se

Selection of courses

Application to the course is done:

- 1 to 15 May for the autumn semester
- 1 to 15 November for the spring semester

with student kth.se account via universityadmissions.se

If the student does not do their course selections by this system his/her application is only considered upon availability.

In a few courses, the number of participants is limited. Selection is done by the school responsible for the course.

A student may only take courses that are included in the study plan.

Choice of master's programme

The student must apply for the master's programme he/she wishes to follow during study years 4–5 according to instructions given by the CSC education administration office.

Conditions for further studies

For students starting their education from the autumn semester 2018, previous promotion requirements have been replaced with special admission requirements to each course. Admission requirements are specified in the course syllabus.

Requirements for advanced level:

In order to be eligible for advanced level studies within the integrated Master of Science programmes at KTH, you are required to complete 150 credits from year one through three. Of these, 110 credits must be from the year 1 and 2 curriculum. In addition to these credits, the bachelor thesis needs to be completed before Master’s level studies commence.

Please see the KTH regulations: http://www.kth.se/en/

Recognition of previous academic studies

Studies at another university can be transferred. An application form can be found on the KTH Student pages.

The application form is submitted to the CSC education administration office.

KTH's policy for recognition of previous academic studies are entirely in the KTH regulations

http://www.kth.se/en
Studies abroad

Students at the Master of Science in Engineering in Computer Science and Engineering programme have the opportunity to study one or two semesters abroad through agreements KTH has with universities within and outside the EU. Exchange studies are not appropriate during the first and second study years. It is also possible to make the final degree project (second cycle) abroad.

For more information contact the international coordinator at CSC.

More information is found on the KTH student web and at:

http://intra.kth.se/regelverk/utbildning-forskning/grundutbildning/utbytesstudier

Degree project

Degree project, undergraduate level

A degree project of 15 ECTS credits at undergraduate level is done during study year. The project work may begin when special admission requirements for the course are fulfilled.

KTH comprehensive rules and guidelines for degree projects of 15 ECTS credits for Degree of Bachelor of Science 180 ECTS credits, and grading of the project are found in the KTH regulations.

http://intra.kth.se/en/

Degree project, graduate level

A second degree project of 30 ECTS credits (second cycle) is done during study year 5. The project work may begin when special admission requirements for the course are fulfilled.

KTH comprehensive rules and guidelines for degree projects of 30 ECTS credits for Degree of Master of Science in Engineering, Degree Programme in Computer Science and Technology 300 ECTS credits, and grading of the project is found in the KTH regulations.

http://intra.kth.se/en/

In addition the following applies:

For a student who within the selected Master program does a degree project examined by any other school than CSC, the program director for the Master of science of engineering program in Computer Science and Engineering must approve the specification and the final report to certify the relevance of the degree project in relation to the program.

Degree

Application for graduation

Students may apply for the following degrees: Degree of Bachelor of Science and Degree of Master of Science in Engineering, Degree Programme in Computer Science. Students can also request for Degree of Master of Science (Two Years) if the requirements for this degree are met.

Instructions for the application are available on the KTH student web.

Conditions for the Degree of Bachelor of Science 180 ECTS credits

The Degree of Bachelor of Science is received if the student applies for graduation after the completion of the 3rd study year and fulfils the national degree requirements, i.e. has completed courses corresponding to 180 ECTS credits, including

- Mathematics/natural science subjects carry at least 25 credits;
At least 90 credits are (including a 15-credit degree project) with increasingly in-depth studies in the main field of study.

**Degree name**
Teknologie kandidatexamen
Degree of Bachelor of Science

**Conditions for the Degree of Master of Science in Engineering**

300 ECTS credits

The Master of Science in Engineering degree is received after completing the programme. The programme is designed so that the student fulfills the national degree requirements and has completed courses corresponding to 300 ECTS credits, including

- Mathematics/natural science subjects must carry at least 45 credits, and in addition at least 180 credits (including a 30-credit degree project) must be within the framework of the engineering area;
- At least 90 credits at second level, of which at least 60 credits (including a 30-credit degree project) must be within the framework of the engineering area.

**Degree name**
Civilingenjörsexamen
Degree of Master of Science in Engineering, Degree Programme in Computer Science and Technology

**Conditions for Degree of Master of Science (Two Years) 120 ECTS credits.**
