Degree Programme in Computer Science and Engineering 300 credits

Civilingenjörsutbildning i datateknik

Valid for students admitted to the education from autumn 19 (HT - Autumn term; VT - Spring term).

This is a translation of the Swedish, legally binding, programme syllabus.

Programme objectives

The Engineering programme in Computer Science at KTH aims to give students opportunities and ability to participate in and lead the work on valuation, development and introduction of new computer technology.

Knowledge and understanding

The programme has the goal that a Master of Computer Science and Engineering should:

- have fundamental knowledge within Computer Science and Engineering.

- have profound knowledge in mathematics, i.e. have the ability to explain and carry out mathematical reasoning and define and analyse mathematical models.
- have knowledge in human- and natural sciences, especially such knowledge which has consequences for design of computerized systems.
- have knowledge about industrial entrepreneurship and relevant legislation.

Skills and abilities

The programme has the goal that a Master of Computer Science and Engineering should:

- have prerequisites and abilities to participate in and develop the practices which are applied in industry, administration, and academic research.
- have the ability to independently define and solve computer-related construction problems.
- have the prerequisites for successful work in international and multidisciplinary project groups which consist of people from both technical and non-technical backgrounds. This includes the ability to orally, and in writing, present as well as argue in Swedish and English.

Ability to make judgements and adopt a standpoint

The programme has the goal that a Master of Computer Science and Engineering should:

- Independently analyse and adopt a standpoint on economical, societal, environment-related and ethical consequences of computer science applications, and to design systems concerning this.
- Through self-development, retain one's professional abilities during a professional career.
- Follow and promote the discussion concerning technology in society.

Extent and content of the programme

The Master of Computer Science and Engineering is composed of 300 ECTS credits, which, at normal study rate, corresponds to 5 years of full-time study (10 semesters). The first three years (180 ECTS credits) are on undergraduate level. The final two years (120 ECTS credits) the student follows one of the following master programmes.

Master's programmes for a Degree of Master of Science in Engineering, Computer Science:

- Computer Science
- Machine Learning
- Interactive Media Technology
- Information and Network Engineering
- Systems, Controls and Robotics

- Communications systems
- Embedded Systems
- Software Engineering of Distributed Systems
- Industrial Management
- Applied Computational Mathematics
- Medical Engineering
- ICT Innovation

The selection of elective master's programmes can be changed.

Language of instruction

The language of instruction, during the first three years of the programme is mostly in Swedish, although English literature will be used. The concluding two years are taught in English.

Eligibility and selection

General admission requirements and the following special admission requirements must be fulfilled in order to be admitted: Mathematics 4/Mathematics E, Physics 2/Physics B and Chemistry 1 /Chemistry A, with the lowest grade E/Approved.

Selection is based on high school grades and results of the university examination, two thirds of the places are appointed on the basis of grades and one third on the basis of the university degree.

Implementation of the education

Structure of the education

Each academic year consists of two semesters which are 20 weeks each, and each semester is further divided into two study periods.

The syllabus for the Master of Computer Science and Engineering programme consists of:

- courses in study year 1–3, concluded by a degree project at undergraduate level
- courses in study year 4-5 within the chosen master's programme, of which at least 60 credits must consist of courses in computer science at second cycle. Year 5 is concluded by a degree project in second cycle.

Language engineering profile

The specialisation in Language Engineering begins in the fall semester in study year 2. Information about application, possible changes to the curriculum is given during the spring semester of study year 1.

International profile

The international profile starts in study year 2 and includes courses in the profile language and a possibility to spend one or two semesters at one of the KTH partner universities using the language of the profile. Currently the following profile languages are offered: Japanese, Chinese, French, German, and Spanish. Information about application, possible changes to the curriculum and the requirements to achieve an international profile is given during the spring semester of study year 1.

Courses

The programme is course-based. Lists of courses are included in appendix 1.

Grading system

Courses in the first and the second cycle are graded on a scale from A to F. A-E are passing grades, A is the highest grade. The grades pass (P) and fail (F) are used for courses under certain circumstances.

The grading scale is found in the course syllabus.

Conditions for participation in the programme

Participation requires admission to courses within the programme, and course registration.

For further studies, special admission requirements for the course are to be fulfilled. Special admission requirements are listed in the respective course syllabus.

Degree project

The degree project is the final part of the education. The project work may begin when special admission requirements for the course are fulfilled.

In addition the following applies:

For a student who within the selected Master programme does a degree project examined by any other school than EECS, the programme director for the Master of science of engineering programme in Computer Science and Engineering must approve the specification and the final report to certify the relevance of the degree project in relation to the programme.

Degree

Degree of Master of Science in Engineering

Students may apply for the following degrees: Degree of Master of Science in Engineering, Degree of Bachelor of Science and Degree of Master of Science (Two Years), if the requirements for this degree are fulfilled.

Conditions for the Degree of Master of Science in Engineering 300 ECTS credits

The Master of Science in Engineering degree is received after completing the programme. The programme is designed so that the student fulfills the national degree requirements and has completed courses corresponding to 300 ECTS credits, including:

- mathematics/natural science subjects must carry at least 45 credits, and in addition at least 180 credits (including a 30-credit degree project) must be within the framework of the engineering area,
- at least 90 credits at second level, of which at least 60 credits (including a 30-credit degree project) must be within the framework of the engineering area.

Appendix 1: Course list

Degree Programme in Computer Science and Engineering (CDATE)

General courses

Year 1

Mandatory courses (64.0 Credits)

Code	Name	Credits	Edu. level
DA1600	Writing in the Engineering Profession	4.5 hp	First cycle
DD1337	Programming	7.0 hp	First cycle
DD1338	Algorithms and Data Structures	6.0 hp	First cycle
DD1349	Project in Introduction to Computer Science	3.0 hp	First cycle
DD1390	Programme Integrating Course in Computer Science Engineering <i>Of which 2 credits belong to study year 1.</i>	6.0 hp	First cycle
DD1396	Parallel and Concurrent Programming in Introduction to Computer Science	3.0 hp	First cycle
DH1620	Human-Computer Interaction, Introductory Course	6.0 hp	First cycle
SF1547	Numerical Methods, Basic Course	6.0 hp	First cycle
SF1624	Algebra and Geometry	7.5 hp	First cycle
SF1625	Calculus in One Variable	7.5 hp	First cycle
SF1671	Mathematics, Basic course, with Discrete Mathematics	7.5 hp	First cycle

Supplementary information

The introductory course in mathematics can **not** be included in the degree.

Year 2

Mandatory courses (57.0 Credits)

Code	Name	Credits	Edu. level
DD1351	Logic for Computer Scientists	7.5 hp	First cycle
DD1362	Programming Paradigms	6.0 hp	First cycle
DD1368	Database Technology	6.0 hp	First cycle
DD1369	Software Engineering in Project Form	10.5 hp	First cycle
DD1390	Programme Integrating Course in Computer Science Engineering <i>Of which 3 credits belong to study year 2.</i>	6.0 hp	First cycle
IS1500	Computer Organization and Components	9.0 hp	First cycle
ME1010	Organization and Knowledge-Intensive Work	6.0 hp	First cycle
SF1924	Probability Theory and Statistics	6.0 hp	First cycle

Conditionally elective courses

Code	Name	Credits	Edu. level
DD1354	Models and Simulation <i>Either DD1354 or SF1626 must be taken</i>	6.0 hp	First cycle
SF1626	Calculus in Several Variables <i>Either DD1354 or SF1626 must be taken</i>	7.5 hp	First cycle

Supplementary information

Subject to changes.

Year 3

Mandatory courses (50.0 Credits)

Code	Name	Credits	Edu. level
AL1504	Sustainable Development for Computer Science and Engineering	7.5 hp	First cycle
DA150X	Degree Project in Computer Science and Engineering, First Cycle	15.0 hp	First cycle
DD1390	Programme Integrating Course in Computer Science Engineering <i>Of which 1 credit belong to study year 3.</i>	6.0 hp	First cycle
DD2350	Algorithms, Data Structures and Complexity	9.5 hp	Second cycle
ID1200	Operating Systems	6.0 hp	First cycle
SF1688	Discrete Mathematics	6.0 hp	First cycle

Supplementary information

Subject to changes.

Appendix 2: Specialisations

Degree Programme in Computer Science and Engineering (CDATE)

This programme has no specialisations.
