Programme syllabus

Master's Programme, Architecture, 120 credits
Masterprogram, arkitektur
120.0 credits

Valid for students admitted to the education from autumn 19 (HT - Autumn term; VT - Spring term).

This is a translation of the Swedish, legally binding, programme syllabus.

Programme objectives

The information applies to students starting their studies in the academic year 2019-2020. There may be changes in the programme content for years 2. Always refer to www.kth.se for information on the latest approved syllabus.

The overall aim of the programme is to ensure individual progression and individual deepening of knowledge, competence and judgement within architecture and related areas.

The programme fulfils the objectives of the local qualifications ordinance of the Royal Institute of Technology and to the objectives of the Swedish Higher Education Ordinance (1993:100).

Knowledge and understanding

A student who has completed the programme should be able to:

- demonstrate knowledge of the disciplinary and artistic foundation of the field and insight into relevant research and development work and
- demonstrate both broad knowledge and understanding of architectural theory and history as well as specialised knowledge of architectural design, planning and the development of built environments and also the processes, methods and statutory provisions that affect them.

Skills and abilities

A student who has completed the programme should be able to:

- demonstrate the ability to plan, design, maintain and renew built environments and buildings in complex contexts and with a holistic approach informed by various demands, in particular the sustainable development required by the community
- demonstrate the ability to use appropriate architectonic methods and syntheses to undertake and evaluate advanced and creative tasks autonomously and critically and within predetermined parameters in the field of architecture and urban planning
- demonstrate the ability to apply knowledge about physical circumstances and technological principles to the erection and alteration of buildings
- demonstrate the capacity for teamwork and collaboration with various constellations, and
- demonstrate the ability in dialogue with different audiences in both national and international contexts to present
and discuss, using images and models, his or her conclusions and the knowledge and reasoning on which they are based in speech, writing or some other way and so contribute to the development of the profession and professional practice.

**Ability to make judgements and adopt a standpoint**

A student who has completed the programme should be able to:

- demonstrate the ability to adopt a holistic view in making judgements and appraisals informed by the relevant disciplinary, social, aesthetic and ethical aspects and which at the same time take into account the different needs and functional abilities of communities and individuals as well as the interaction between individuals and their physical settings, including occupational health and safety
- demonstrate the disposition to base his or her work on high-quality, well-designed long-term functional solutions and
- demonstrate the ability to identify the need for further knowledge and undertake ongoing development of his or her skills.

**Extent and content of the programme**

The two year Master's programme in Architecture corresponds entirely to Advanced Level of the Degree Programme in Architecture.

The overall aim of the two year master's programme in Architecture is to ensure individual progression and individual deepening of knowledge, competence and judgement within architecture and related knowledge areas.

Each semester of the two year Master's programme in Architecture consists of:

- two Studio Projects (12 credits each)
- two courses: an Orientation course (3 credits) and a Seminar course (3 credits)

The last semester consists of a final independent Degree Project (30 credits).

During the two year Master's programme in Architecture an individual student completes six Studio Projects, each providing an opportunity to apply and develop skills in varied application areas; and tools to reflect on the learning process.

The courses include the conceptions and ideas relating to society’s goal for sustainable development.

**Teaching language**

The main teaching language is English

**Eligibility and selection**

**Specific requirements for the Master’s Program in Architecture:**

- A Bachelor’s degree in Architecture corresponding to 180 ECTS credits, or equivalent.
- English language proficiency equivalent to (the Swedish upper secondary school) English course B/6.

The portfolio should indicate necessary skills and the ability to make use of the education as well as independence in utilizing adequate methodology to implement and evaluate architecture projects by the following criteria:

Building complexity
Development of project/ level of sophistication
Technical aspects
Design and aesthetics
Theoretical, historical and contemporary context
Portfolio layout
Selection:
Evaluation: The selection is based on the portfolio.

The evaluation scale is 1-75.

Implementation of the education

Structure of the education

The Academic Year is 40 weeks.

The two year Master's programme in Architecture depends little on traditional examinations, which is why the academic year runs continuously without week long breaks for exams.

Courses

The programme is course-based. Lists of courses are included in appendix 1.

The programme combines courses and projects with studio-based teaching. The course list specifies the course offered each academic year. A student who repeats a year of study or returns to his/her studies after a leave of absence, must follow the current course syllabus.

The objectives, qualification requirements, content and course requirements can be found in the course syllabus.

The project portfolio is a pedagogical tool used throughout the programme. It is the student's responsibility to assemble a portfolio from previously achieved project results. Portfolio reviews are undertaken regularly as part of courses and studio projects, in order both to support individual reflection in relation to the learning process, and to assess the student's progression of knowledge at different stages of the programme.

Grading system

Courses in the first and the second cycle are graded on a scale from A to F. A-E are passing grades, A is the highest grade. The grades pass (P) and fail (F) are used for courses under certain circumstances.

The grades pass (P) and fail (F) are generally used in the programme.

Conditions for participation in the programme

Participation requires admission to courses within the programme and course registration. Course registration is done via the personal menu at www.kth.se

For students starting their education from the autumn semester 2018, previous promotion requirements have been replaced with special admission requirements to each course. Admission requirements are specified in the course syllabus.

Course application

From Study Year 1 and onwards the student must apply on universityadmissions.se for the compulsory courses of the two year Master's programme in Architecture to be taken the following semester.

Special completion rules apply which are accessible on the programme web.

Recognition of previous academic studies

Students have the opportunity to apply for credit transfer of results from courses at another higher education institution.
university within or outside the country. The entire KTH policy for credit transfer is included in KTH's regulatory framework, www.kth.se.

For more information, refer to the Programme's study advisory service.

Studies abroad

Students within the Master's programme in Architecture are eligible for exchange studies in the second semester of Year 1 and in the first semester of Year 2.

Degree project

The degree project is the final part of the education. The project work may begin when special admission requirements for the course are fulfilled.

The Degree Project in Architecture comprises 30 credits.

Degree

Master of Science with a major in Architecture, 120 credits

- Qualifications requirements for the Degree of Master of Science with a Major in Architecture, 120 credits

  The Degree of Master of Science with a Major in Architecture may be awarded after completion the equivalent of all compulsory courses within two year Master's programme in Architecture and if the student fulfills the National qualifications requirements.

  Local regulation for qualifications at first- and second cycle: www.kth.se
